

Epson TM-C3400

Accurate and Cost-effective Colour Label Printer

- High quality on-demand colour label printing for a variety of applications such as healthcare, retail, manufacturing, logistics, etc.
- Features Epson's renowned Micro-Piezo Inkjet Technology.
- Fast print speeds of up to 92mm per second (56mm print width) in high-speed mode

TM-C3400

COLOUR PROTECTS PEOPLE & INVESTMENTS

Human attention is a valuable asset. Does a patient receive the right medication?

Was the correct spare part installed in a machine? Is a visitor authorised to enter the VIP area?

Does an express package make it on board the flight from Sydney to Singapore?

Good or poor legibility of a printed label, especially under time pressure, can have serious consequences.

Colour highlights your brand & your image

Colour ensures that logos are recognised and re-inforced. In healthcare, logistics, trade, industry and marketing, the Epson TM-colour label printer covers a wide variety of new applications for reliable visual identification using colour.

Use it to print a wide range of formats, materials and surfaces on demand. Would you like to have individual labels or 1,000 labels at once? No problem. Save on the cost of expensive pre-printed stock and produce your colour labels yourself on an as-needed basis.

Colour is an effective signal & easily understood

Colour is a reliable way of warning about danger. Colour helps you communicate complex content at a glance. Highlight the facts. Set priorities. Differentiate among groups and categories.

A Printer For A Wide Range Of Applications

Medical

Colour helps identify patients and medications, highlights important auxiliary information on medical charts.

Events & Ticketing

Personalised, colourful wristbands are a valuable tool for reliable access control at major events. Customised tickets issued to individuals guard against counterfeits, and colour can be used to create unique and attractive designs.

Logistics

Coloured dispatch labels help you select from different groups and categories rapidly and reliably.

GREATER SECURITY FOR DOCTORS AND PATIENTS

Patient wristband:

Ensure correct allocation by means of a photo

Printed wristbands with barcode, text as well as a photo can be used to identify patients reliably.

Medical controlling:

Charge costly medications correctly

Colour labels give your staff a clear visual indication from the moment that drugs are dispensed that certain high-priced medications have to be carefully documented.

Injections and infusions:

Label your preparations

In operating rooms for example, certain applications require the preparation of injections and infusions a short time in advance. Colour labels that can be printed on demand help your staff declare the contents quickly and conveniently. This method saves time while substantially raising your process quality.

Industry

Colour facilitates industrial manufacturing processes simply and cost-efficiently. Colour labels help employees in the automotive industry, for example, to identify and assign different components reliably, even under stressful conditions. Sources of error are reduced in this way.

Retail

Information highlighted in colour on price tags or shelf labels assists with sales promotion in retail business.

Air travel

In addition to automatic inspection by machines, boarding cards and baggage labels often have to be visually inspected. Colour-coded priorities and personal ID photos, for example, increase security in the identification of baggage and passengers.

PRINT THOUSANDS OF TICKETS EVERY DAY

Take advantage of the many new possibilities offered by the rapid desktop inkjet label printer. As an event promoter or ticket distributor, your Epson TM-C3400 constitutes your own “in-house print shop”. Reliable, extremely easy to operate and satisfyingly economical.

Ticketing

Here's how to protect yourself against ticket counterfeiters

Tickets bear both monetary value and brand imagery. More and more event promoters are personalising their admission tickets, as a preventative measure against the black market and also for a more appealing visual impression.

Wristbands

Highest security for your major event

Personalised wristbands are an effective tool for the reliable, fast and cost-effective identification. With the Epson TM-C3400 colour label printer, you can increase the security of conventional ID wristbands through personalisation and colour.

Use colourfully printed wristbands and tickets in a broad range of applications:

- Trade shows and conferences (exhibition tags)
- Concerts and festivals (wristbands)
- Resorts and amusement parks (IDs)
- Car parks, parking spaces (car park tickets)
- Sporting events (admission tickets)
- TV productions (admission tickets)

TM-C3400

EPSON TM-C3400 COLOUR LABEL PRINTER

The major benefits at a glance:

Cost-effectiveness

You can print 7,500 labels* with a single ink cartridge. Conventional thermal printers consume ink ribbons as large as a complete label, even if you only print a single line. Inkjet printing is considerably more efficient in this case. Integrated as standard, the auto cutter trims rolls or continuous paper according to your specifications. This means you avoid unnecessary wastage of paper and do not need to store different label sizes and colours.

Speed

With high print speeds of up to 92mm/sec (printing width: 56mm, 360 x 180 dpi, bi-directional printing) you don't have to keep the customers waiting.

Versatility

The Epson TM-C3400 colour label printer is a master of versatility. Use it to print a large selection of different formats, materials and surfaces: labels, wristbands, tickets, continuous paper, etc, on media widths 25.4 to 108 mm.

Permanency

Epson pigment inks ensure excellent permanency compared to thermal printing processes. This system is ideal for labels exposed to sunlight and moisture or for labels used in medical applications.

Data privacy

Thermal Transfer printers leave printed data as a negative image on the ink ribbon, so used ink ribbons need to be disposed of carefully. This is not an issue with an inkjet printer.

Convenience

Place the Epson TM-C3400 on a shelf or under a counter to save space. It is the only inkjet label printer with all operating elements positioned on the front face[^]. Consumables can be replaced in the front in a few simple steps. The powerful software and driver support enables you to perform central administration and configuration of large installations with up to 64 printers.

Environmental protection

Unlike thermal printers or other inkjet technologies, Epson Piezo™ printing technology requires no heating of components. This means energy consumption is minimised. Plus, consistent compliance with the technical standards RoHS (Restriction of Hazardous Substances Directive) and WEEE (Waste Electrical and Electronic Equipment Directive) ensures continued contribution to the protection of our environment.

* Reference value (print area when printing on plain media with image resolution 360 x 180 dpi: 54mm (W) x 31 (H)).

[^] Except when using fan fold paper, where the paper path is through the rear of the printer.

Economical and flexible. Colour labels on-demand.

Using fan fold paper further extends the range of applications.

Extremely easy replacement of cartridges and paper thanks to front-facing controls allows installation under a counter, for example.

Epson TM-C3400

Product Specifications

Print method	MicroPiezo® inkjet, 3 colours with pigment ink, Automatic Nozzle Checking technology, composite black
Print Resolution	360 dpi x 180 dpi, 360 dpi x 360 dpi, 720 dpi x 360 dpi
Interfaces	USB or Ethernet
Print font	Not equipped with print fonts; prints all data as graphic data
Barcodes	This printer does not have a barcode / two-dimensional symbol encoding function. Following barcode / two-dimensional symbol data (graphic data) are provided by the EPSON Windows driver. Barcodes: UPC-A, UPC-E, JAN13(EAN), JAN8(EAN), Code39, ITF, Codabar, Code93, Code128, GS1-128, GS1 DataBar Omnidirectional, GS1 DataBar Omnidirectional, GS1 DataBar Truncated, GS1 DataBar Limited, GS1 DataBar Expanded 2-dimensional symbols: PDF417, QR Code, Maxi Code, GS1 DataBar Stacked, GS1 DataBar Stacked Omnidirectional, GS1 DataBar Expanded Stacked, Composite Symbology, DataMatrix, Aztec
Print speed	Max. 92 mm / sec. (printing width: 56 mm, 360 dpi x 180 dpi, bi-directional printing)
Paper	Supports a wide range of media types such as Plain paper, Fine paper, Continuous paper, Synthetic paper, Die-cut label, PET film, Wristbands, etc. Media widths range from 25.4mm to 108mm. For full detailed paper specifications please refer to www.epson.com.au
Printing width	Max. 104 mm
Ink cartridge	SJIC15P (3-colour combined, pigment ink)
Power consumption	Operating : Approx. 26 W (100BASE-TX / 10BASE-T)
Reliability	
MTBF	75,000 hours
MCBF	9.8 million lines
Overall dimensions (mm)	255 (W) x 270 (D) x 255 (H)
Mass (Approx.)	10.0 kg
EMC standards	VCCI class B, FCC class B, CE marking
Power supply	Embedded AC adapter
Safety Standards	UL / CSA / TÜV (EN60950-1)
Operating System	Microsoft Windows® 2000 SP4, Microsoft Windows® XP SP3, Microsoft Windows® 2003 R2 SP2, Microsoft Windows Vista® SP1 (Only 32 bit Version support)

The TM-C3400 comes with a space-saving integrated PS-180 power supply and is available in a USB and a network version.
