NEW!

LX4000 COLOR LABEL PRINTER

NOW WITH
BIG INK!

LX4000 is the newest, highest-quality label printer developed by Primera. LX4000 features a tanked-ink system and print head for either dye or pigment ink. The tanked-ink system allows LX4000 to deliver a lower cost per print than any other Primera printer. LX4000 also features Primera's innovative ClearView™ ink tank system, which allows users to monitor ink levels effortlessly without ever needing to open the printer's cover.

LX4000 Features Include:

- » Color inkjet printing at up to 4800 dpi with print speeds of up to 4.5"/sec (114 mm/sec)
- » Print width of 0.75" to 8.25" (19mm to 210mm)
- » Print length of 0.75" to 24" (19mm to 609mm)
- » Wired ethernet for network connections
- » Incorporates CMY+ Ultra Black ink for deep black, sharp text, bright colors and superior water-resistance with white gloss BOPP material and other approved substrates. Pigment ink is also available for superior UV resistance.
